November 21–27, 1998
Jasná, Slovakia

Organized by
Slovak Society for Computer Science,
Czech Society for Computer Science,
Slovak Research Consortium for Informatics and Mathematics

SOFSEM (**SOF**tware **SEM**inar) is a full seven–day international meeting devoted to the theory and practice of software systems. Its aim is to foster cooperation among professionals from academia and practice. The program consists of a series of *Invited Talks*, given by prominent professionals and researchers, and *Contributed Talks and Posters* selected by the Program Committee. It offers a unique opportunity to obtain quickly a representative overview of the areas of computer science which are selected as the topics of the year. The proceedings will contain both invited and contributed papers. They will be published by the Springer-Verlag in the Lecture Notes in Computer Science series and distributed at the conference. The working language of SOFSEM is English. The conference site provides an optimal framework for discussions, meetings, establishing contacts, and socializing. SOFSEM is especially suited for young computer scientists. The silver jubilee SOFSEM'98 will feature a special block of invited talks on major achievements in selected areas of computer science. Besides, a series of invited talks will be presented in the following areas: Distributed and Parallel Systems, Electronic Commerce, Electronic Documents and Digital Libraries, and Trends in Algorithmics.
